

**Marc Lorch is the new Chairman
of the Supervisory Board of Ti-
tanium Textiles AG**

At its last meeting, the Supervisory Board of Titanium Textiles AG elected Marc Lorch as its new Chairman. Marc Lorch has been a member of the Executive Board of König + Neurath AG since May 2022 and will take over as Chairman of the company's Executive Board in the coming months. Before, he was CEO and spokesman of the executive board of Dr. Zwissler Holding AG in Gerstetten for many years.

Titanium Textiles is a young company specialized in the production of textile structures from elastic titanium. The main areas of application are in medicine, e.g. in the form of surgical meshes for the treatment of hernias.

It was this unique technology that prompted Marc Lorch to accept the offer to become Chairman of the Supervisory Board:

"I have been associated with technical textiles all my life and with all my heart. We were already working on surgical meshes in my parents' company 30 years ago. To see that we have now succeeded in producing titanium as a flexible material has caught me from the very beginning, and I am extremely pleased to be able to contribute to the success of Titanium Textiles AG," Marc Lorch says.

Christoph Ehlers, CEO of the company, adds: "With Marc, we are getting one of the leading minds in the German textile industry on board and we are extremely honored that he has accepted our offer. We need partners like him, because our project ranges from the manufacture of titanium microwires and the production of technical textiles to the approval and marketing of class III medical products. We need the best brains to successfully manage this valuable but also complex project.
